Ethiopia is a country of origin, transit, and destination for migrants, with approximately 250,000 Ethiopians migrating annually, driven by natural and man-made disasters and severe economic hardship. The number of migrants in need on the Eastern route is estimated to exceed 300,00 in the coming years. In 2022, almost 100,000 Ethiopians were forcibly returned from KSA, with one in six from Tigray regional state. Between January 2021 and December 2022, half of the returnees from KSA were reported to originate from drought-affected areas of Ethiopia. Both spontaneous and forced movements across Ethiopia's land borders occur, with thousands of movements each month.

Safe and dignified return and sustainable reintegration are essential parts of a comprehensive approach to migration management. IOM assists migrants in making informed decisions on their return and reintegration back into their communities. Migration Response Centres (MRCs) operate along key migration routes, providing direct assistance, including food and temporary shelter, information, and service referrals to people on the move. IOM supports Technical and Vocational Education

and Training (TVET) facilities to provide quality training to prospective migrant workers, supports GoE with evidence-informed migration management through the generation, analysis, and dissemination of migration data to respond more effectively to diverse migration and border governance issues.

IOM also works to enable migrants to benefit from an improved standard of physical, mental, and social well-being, so they can substantially contribute to social and economic development. IOM's health programming includes health assessments, vaccination activities, Tuberculosis diagnosis and treatment under Directly Observed Therapy (DOT), pre-departure medical services for resettlement purposes, and a variety of health promotion/assistance services.

In close coordination with key partners, IOM conducts resettlement, family reunification, humanitarian, and other admission initiatives, by facilitating movement and logistical assistance, handling the visa application process to Canada, and facilitating family reunification of vulnerable migrants with their families in Germany.

individuals reached through return and reintegration activities.

**1,150**

individuals reached through protection assistance.

**1,910**

individuals reached through migration health.

**3,160**

individuals reached through movement support.

## RETURN AND REINTEGRATION

Safe and dignified return and sustainable reintegration are essential parts of a comprehensive approach to migration management.

Together with a vast network of partners comprising governmental authorities and non-governmental partners both in the region and in the countries of origin, IOM Ethiopia assists migrants in making informed decisions on their return and reintegration back into their communities.

**13,190**

Returnee migrants registered, profiled and screened for vulnerabilities upon arrival

## MIGRANT PROTECTION AND ASSISTANCE

Migration Response Centres (MRCs) operate along key migration routes, providing direct assistance, including food and temporary shelter, information, and service referrals to people on the move. Working collaboratively, MRCs bring together key partners to facilitate the identification of migrants in vulnerable situations and ensure that they receive appropriate, immediate and longer-term support.

**620**

migrants received non-food items (NFIs), temporary accommodation, food, water and awareness raising

**9**

migrants received medical support either at MRCs or through referral to specialized service providers

**1,050**

migrants benefited from protection assistance

**970**

migrants received transportation assistance to return to their communities of origin

## MIGRATION HEALTH

IOM works to enable migrants and IDPs to benefit from an improved standard of physical, mental and social well-being, so they can substantially contribute to social and economic development. IOM's health programming includes health assessments, vaccination activities, Tuberculosis diagnosis and treatment under Directly Observed Therapy (DOT) and pre-departure medical services for resettlement purposes. IOM also provides a variety of health promotion/assistance services.

**420**

Persons vaccinated as per resettlement country protocols

**114**

DNA sample collection and analysis for family reunification

**11**

People screened for COVID – 19 for clinical and travelling purpose

**2**

Migrants received travel assistance with medical travel requirements

## LABOUR MOBILITY AND SOCIAL INCLUSION

To maximize positive aspects of labour migration, including harnessing its potential for development, IOM Ethiopia conducts strategic initiatives, such as strengthening the capacity of Technical and Vocational Education and Training (TVET) facilities to provide quality training to prospective migrant workers.
