

## CRISIS RESPONSE OVERVIEW

JUNE 2023

#### CONTEXT

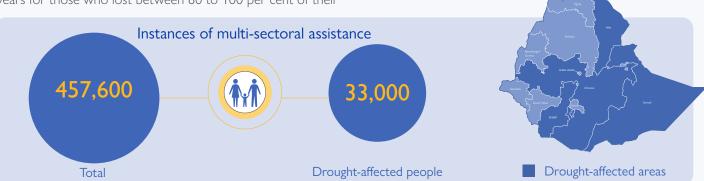

The deteriorating humanitarian situation in recent years has led to increased humanitarian needs across Ethiopia, with over 20 million people — internally displaced persons (IDPs), returning IDPs, crisis-affected communities, returning migrants, and their home communities among them — needing humanitarian assistance and protection services in 2023. More than 3.1 million IDPs have been identified in Ethiopia at the end of 2022, with displacement risks remaining high in 2023 and beyond. Conflict in the northern parts of the country, violence in many other parts, and natural hazards such as one of the worst droughts in recent decades, frequent floods, and landslides are the main drivers of displacement and needs. Communities in southern and eastern parts of Ethiopia are suffering from a devastating drought following five consecutive failed rainy seasons.

Despite recent rainfall in parts of these areas, the humanitarian condition of vulnerable pastoralists and agro-pastoralists remains extremely dire as their livelihoods have been severely impacted. While the rains may have provided temporary solace through replenished surface water sources and slight regeneration of pasture in some areas, recovery from a drought of this magnitude is estimated to take between 5 to 8 years for those who lost between 80 to 100 per cent of their

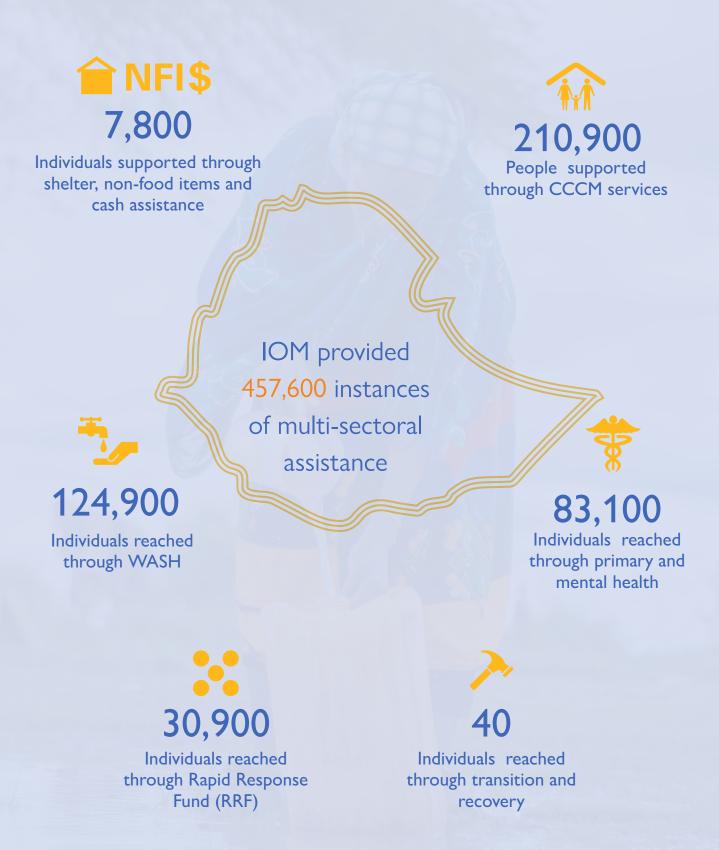

livelihood. Access to food and water for many households is expected to continue to be extremely limited in 2023 and beyond and continues to require urgent humanitarian assistance.

The prolonged drought followed by excessive seasonal rains have also brought with them off-season flood emergencies, displacing thousands across Afar, SNNP, Oromia, Somali, Sidama, and Dire Dawa, and causing additional livelihood loss notably in underserved and drought affected areas.

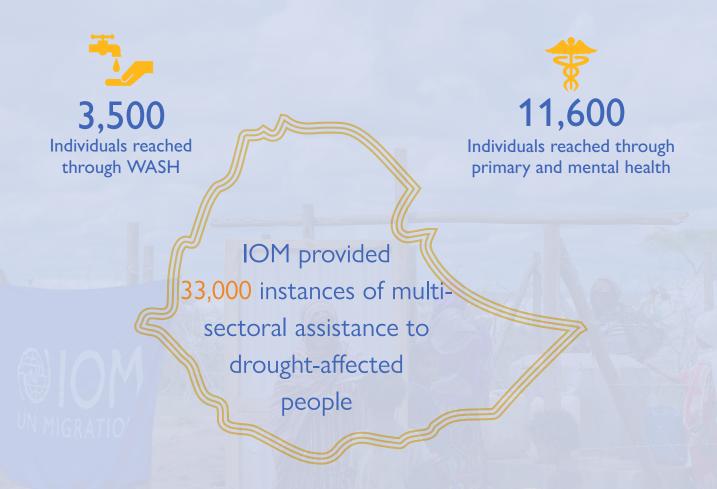

High displacement and damage to infrastructure and basic services have exposed the population to major protection risks. With large influx of refugees into Ethiopia from neighbouring countries, need for safe and secure transportation of refugees to designated sites will also remain high throughout 2023. In addition, armed conflict in Sudan has forced tens of thousands of people to flee to Ethiopia from Sudan, requiring multisectoral assistance including health and WASH assistance, transportation, and tailored protection services. Alongside immediate humanitarian assistance, transition and recovery efforts are needed for affected communities to be able to recover. IOM is responding to the needs of crisis-affected communities across Ethiopia.

#### INDIVIDUALS REACHED BY SECTOR

# DROUGHT-AFFECTED INDIVIDUALS REACHED BY SECTOR

1,800
Individuals assisted by SNFIs Cluster partners

16,100
Individuals reached through RRF

## Shelter, Non-Food Items, and Cash Assistance

IOM is constructing, repairing, and maintaining household and communal shelters, and distributing essential non-food household items among crisis-affected populations. Cash assistance is also provided to support with shelter, NFIs, and multi-purpose needs of affected households in line with the Cash Working Group (CWG) recommendations.

103,700

Drought-affected individuals supported with shelter and nonfood items by cluster partners

NFI

No. of individuals assisted by SNFIs Cluster partners

37

959,300

## Camp Coordination and Camp Management (CCCM)

IOM is supporting camp management coordination fora, providing tools for data collection, service monitoring, referrals, and other support in camps for the displaced, establishing Community Representative structures for Internally Displaced Persons (IDPs), and building capacity of CCCM partners.

Individuals supported through CCCM services

210, 900

No. of IDP sites supported through CCCM services

62

#### **CCCM Cluster**

50,100

Drought-affected individuals assisted by CCCM Cluster partners

No. of CCCM Cluster partners coordinated

Individuals supported through CCCM Cluster partners

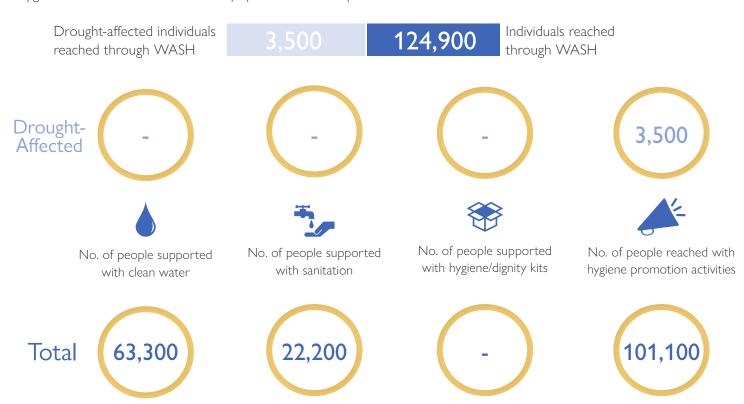

## DISPLACEMENT TRACKING MATRIX (DTM)

IOM's Displacement Tracking Matrix (DTM) conducts nationwide multisectoral needs assessments three times a year to ensure that humanitarian partners, the host government, and donors have sufficient data and analysis to inform operations, decision-making, and advocacy for life-saving humanitarian response. These assessments also help stakeholders remain responsive to the evolving needs of internally displaced persons (IDPs) over time and ensure that vulnerable communities, which may otherwise be overlooked, are not left behind.

## Water, Sanitation and Hygiene (WASH)

IOM is constructing new and rehabilitating existing water supply and sanitation facilities, trucking clean water to communities, distributing essential WASH related non-food items and water treatment chemicals, and promoting hygiene awareness to crisis-affected populations in Ethiopia.

#### PRIMARY AND MENTAL HEALTH

IOM is delivering comprehensive lifesaving primary healthcare and nutrition services, integrating mental health and psychosocial support services, and mitigating GBV risks to vulnerable populations in priority areas. Health facilities are supported through deploying mobile health and nutrition teams.

Drought-affected individuals reached through primary and mental health

83,100

Individuals reached through primary and mental health

#### PRIMARY HEALTH

Drought-Affected

No. of people benefited from medical consultations

No. of women of reproductive age received reproductive health services

No. of people benefitted from health awareness activities

No. of children immunized

No. of U5 children and maternal nutritional status PLW screened for malnutrition

Total

#### MENTAL HEALTH

No. of people received psychosocial support

Drought-Affected

Total

19,300

No. of people benefitted from counselling services

950

No. of people benefitted from mental health awareness activities

12,300

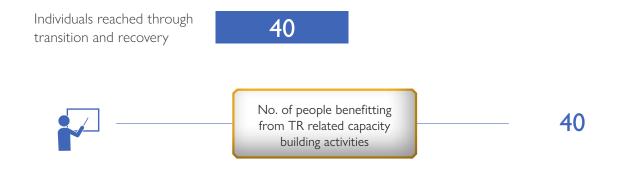

#### RAPID RESPONSE FUND (RRF)

IOM's Rapid Response Fund (RRF) is supporting local and international non-governmental organizations' (NGOs) emergency response projects through small grants. Projects focus on shelter and settlements, essential non-food items (NFIs), cash-for-NFIs, water, sanitation, and hygiene (WASH), Camp Coordination and Camp Management (CCCM), and education. Through RRF, IOM has established an SNFIs pipeline to support SNFIs actors in their delivery of humanitarian assistance in affected areas.

#### TRANSITION & RECOVERY

IOM is supporting crisis-affected communities across Ethiopia to progressively resolve displacement situations and promote voluntary and informed decision-making via institutional capacity building and community empowerment. Social and economic structures are rebuilt by working with community networks and local governments to support and strengthen local governance and policy structures, to build stakeholders' capacity to respond to climate impacts, and to improve community self-reliance. IOM is focusing on supporting sustainable livelihoods and economic activities for distressed communities to improve their socioeconomic conditions and strengthen their local integration, with particular emphasis on socioeconomic empowerment of marginalized groups.

## PROTECTION (Including GBV)

IOM is undertaking key protection interventions through targeted assistance for at-risk persons and households, strengthening community-based protection mechanisms, raising awareness and sharing information on protection risks and accessing key response services, and providing gender-based violence (GBV) response and prevention interventions.

No. of staff able to refer protection cases

19

No. of IOM and partner staff trained in GBV risk mitigation and protection mainstreaming
